SUMMARY

10+ years engineering, 3+ architecting production AI agents. Built CentrOS as a reusable orchestration blueprint — LangGraph state graphs, Temporal durability, Pydantic tool contracts, LangFuse evals — then codified 5+ platform primitives so new workflows ship in 2 days vs weeks. 3,980+ Vitest tests on main.

EXPERIENCE

Founder CentrOS — AI Agent Orchestration Platform *Feb 2026 – Present*
Remote · Canada • TypeScript · Hono · PostgreSQL · Drizzle · Vitest · LLM tool-calling

- Architected CentrOS as 1 reusable AI orchestration layer: stateful multi-agent workflows, typed tool contracts, RAG, observability, governance — production-ready blueprints replacing 4+ bespoke stack assemblies.
- Designed agent runtime on LangGraph state graphs + Temporal-style durability: durable execution, checkpointing, crash recovery, retries, versioned rollouts — 0 silent run loss across 6 months.
- Built eval harness + LangFuse trace pipeline: golden datasets, task-level scorers, regression suites, prompt versioning, failure taxonomy — caught 22+ silent regressions before release.
- Defined org standards across 5 dimensions (state, prompts, retrieval, tool contracts, observability) — turned alpha patterns into production blueprints; new workflows ship in 2 days vs weeks.
- Built MCP-style tool registry with scoped OAuth permissions, JSON-schema validation, retry policy, side-effect logging — turned ad-hoc API calls into 100% audited typed agent tool invocations.

Independent Engineer / Builder Software, AI automation & creative IP *Sep 2022 – Jan 2026*
GTA · Remote • Python · TypeScript · Node · LLM tool-calling · MCP · multi-agent orchestration

- Built LLM workflow automation since ChatGPT launch (Nov 2022): tool-calling/API automations from 2023; LangGraph multi-agent patterns from 2024; MCP integrations from late 2024 — 3+ years compounding.

Creator, WEBTOON Original — AXED WEBTOON *Jun 2018 – Dec 2020*
Remote • Python · OpenCV · image processing

- Designed queue → tooling → review → ship operator workflow at 2M+ monthly views on WEBTOON Original — precursor to today's HITL agent + human production system at CentrOS.

iOS Mobile & Web Developer Coursera *Jan 2017 – Apr 2017*
Mountain View, CA • React · Python · iOS SDK · Swift · NLP/search

- Built React GUI-creation infrastructure at Coursera; cut new-view setup from days to 1 hour and compounded across 5+ teams as the company standard.
- Built Python search tooling lifting course content discovery 60% (pre-LLM NLP era) — same retrieval problem CentrOS now solves with embeddings, hybrid RAG, and pgvector.

SKILLS

AI Architecture:

- Architectural reviews · reference architectures · reusable orchestration blueprints
- LangGraph · Temporal · Pydantic · LangFuse · LangChain · LlamaIndex · CrewAI
- RAG architecture · embedding strategies · context window optimization · evaluation harnesses
- Production AI: CI/CD · containerization · monitoring · rollback · inference cost control
- Human-in-the-loop governance · audit trails · approval gates · standards setting

Languages & Platforms:

- Python 3 · TypeScript · Node.js
- GCP · AWS · Kubernetes · Docker · serverless

EDUCATION

University of Waterloo Bachelor of Software Engineering (BSE) — Computer Software Engineering *2012 – 2018*
Waterloo, ON
