SUMMARY

10+ years platform engineering. Built CentrOS governed agent-execution layer — connectors, scoped OAuth, secrets brokerage, audit trails, approval gates, self-service templates. 100% of high-risk tool calls human-reviewed; 5+ primitives cut new-workflow setup weeks → 2 days. Exact regulated-environment platform this role builds.

EXPERIENCE

Founder CentrOS — AI Agent Orchestration Platform *Feb 2026 – Present*
Remote · Canada • TypeScript · Hono · PostgreSQL · Drizzle · Vitest · LLM tool-calling

- Built reusable AI platform layer — 5+ primitives (connectors, policy-aware tool exec, secrets brokerage, approval gates, eval hooks) — letting teams deploy AI safely without bespoke setup.
- Designed execution boundaries for higher-autonomy agents: access scoping, audit trails, approval criteria, OAuth token brokerage, just-in-time credentials — 100% of privileged calls policy-enforced.
- Created golden paths + 4+ self-service templates for AI workflow deployment — opinionated defaults, guardrails, failure visibility — letting non-expert teams ship without platform escalation.
- Designed agent runtime on LangGraph state graphs + Temporal-style durability: durable execution, checkpointing, crash recovery, retries, versioned rollouts — 0 silent run loss across 6 months.

iOS Mobile & Web Developer Coursera *Jan 2017 – Apr 2017*
Mountain View, CA • React · Python · iOS SDK · Swift · NLP/search

- Built React GUI-creation infrastructure at Coursera; cut new-view setup from days to 1 hour and compounded across 5+ teams as the company standard.

Senior Frontend Developer Faire *Jun 2021 – Aug 2022*
Remote · Canada • React · TypeScript · MobX · Jest · Storybook · A/B testing

- Drove site-wide perf gains via A/B testing + staged rollouts; same guardrail discipline now applied to agent versioning, shadow traffic, and canary releases at CentrOS — 5+ wins shipped.

Software Developer Minted LLC *Aug 2014 – Dec 2014*
San Francisco • Python · image processing · color space conversion · AWS

- Built conversion-loss trackers + shipped 3+ hotfixes during Cyber Monday peak (10x+ traffic spike) — early production-incident response discipline.

SKILLS

AI Platform Engineering:

- Connector layer · execution environments · sandboxing · isolation boundaries
- Governance: access scoping · audit trails · approval gates · escalation policy
- OAuth · secrets management · just-in-time credentials · scoped permissions
- Self-service templates · golden paths · workflow registry · platform observability
- Agentic frameworks: LangGraph · Google ADK · Claude SDK

Cloud & Infra:

- GCP (primary) · AWS · Kubernetes · Docker · infrastructure-as-code · CI/CD

Languages:

- Python · TypeScript · Node.js

EDUCATION

University of Waterloo Bachelor of Software Engineering (BSE) — Computer Software Engineering *2012 – 2018*
Waterloo, ON
