SUMMARY

10+ years engineering, 3+ on agentic AI apps. Built CentrOS on LangGraph/MCP patterns — tool calling, hybrid RAG, memory/state, secure approval gates — dogfooded on 23-unit motel + 20-unit residential ops vertical, 3,980+ Vitest tests on main. Same patterns generalize to enterprise/government workflows.

EXPERIENCE

Founder CentrOS — AI Agent Orchestration Platform *Feb 2026 – Present*
Remote · Canada • TypeScript · Hono · PostgreSQL · Drizzle · Vitest · LLM tool-calling

- Architected CentrOS — agentic workflow platform translating ambiguous biz processes into cloud-native AI systems: tool calling, hybrid RAG, memory/state, approval flows; dogfooded across 2 verticals.
- Built reusable orchestration patterns for multi-turn, multi-agent workflows across LOB APIs, DBs, external services — cut new-use-case deployment from 3 weeks to 2 days.
- Implemented hybrid RAG pipelines on pgvector + OpenSearch: query rewriting, source ranking, chunk hygiene, freshness boundaries, selective context packing — cut prompt token use 40% with grounding intact.
- Established 7 production engineering standards for agentic systems: CI/CD, logging, monitoring, secrets handling, testing, rollback, human approval gates — applied across CentrOS verticals.
- Built MCP-style tool registry with scoped OAuth permissions, JSON-schema validation, retry policy, side-effect logging — turned ad-hoc API calls into 100% audited typed agent tool invocations.

Vertical automation & ops dogfood Conscious Creations *Sep 2022 – Present*
Remote · Canada • Python · FastAPI · LLM tool-calling · workflow automation

- Prototyped accommodations workflows on CentrOS: 3-stage guest-triage pipeline (classify → plan → draft) in Python/FastAPI with HITL approval gates before any irreversible action.

Independent Engineer / Builder Software, AI automation & creative IP *Sep 2022 – Jan 2026*
GTA · Remote • Python · TypeScript · Node · LLM tool-calling · MCP · multi-agent orchestration

- Built LLM workflow automation since ChatGPT launch (Nov 2022): tool-calling/API automations from 2023; LangGraph multi-agent patterns from 2024; MCP integrations from late 2024 — 3+ years compounding.

Creator, WEBTOON Original — AXED WEBTOON *Jun 2018 – Dec 2020*
Remote • Python · OpenCV · image processing

- Designed queue → tooling → review → ship operator workflow at 2M+ monthly views on WEBTOON Original — precursor to today's HITL agent + human production system at CentrOS.

SKILLS

Agentic AI Architecture:

- LangGraph · LangChain · LlamaIndex · CrewAI · MCP · A2A patterns
- Tool calling · function calling · structured outputs · enterprise API integration
- Memory & state management · context engineering · prompt engineering
- RAG · embeddings · vectorization · evaluation · retrieval strategies
- Cloud-native delivery · CI/CD · logging · monitoring · secure deployment

Languages & Platforms:

- Python · TypeScript · Node.js · C / C++
- GCP · AWS · Azure-friendly · Kubernetes · Docker · serverless

EDUCATION

University of Waterloo Bachelor of Software Engineering (BSE) — Computer Software Engineering *2012 – 2018*
Waterloo, ON
